

TOA Audio Catalog

We Supply Sound, Not Equipment. That's Our Corporate Philosophy.

Since being founded in 1934, as a manufacturer of commercial and professional audio equipment and security equipment, we have exported our products from Kobe to more than 100 other countries throughout the world.

In every company within the TOA group, which consists of the main company and 19 subsidiaries, we utilize the technical expertise and know-how that we have accumulated throughout the years in every aspect of production, from product planning and development right through to sales and management.

We are constantly improving our technological capabilities in areas such as acoustics, graphics and networks, and developing innovative products in order to provide customers with the ultimate in good sound and peace of mind to help make their lives more comfortable.

TOA has acquired both ISO9001 quality assurance and

JMI-0020

- Head Office

Basic Management Policy (Three Confidence)

- Total confidence of our customers in the use of all products.
- Total confidence of our associates in all business transactions.
- Total confidence of our employees in all their effort.

TOA recognizes preservation of the Earth's environment as an important aspect of doing business in the world today. Our sta as a whole remains actively committed to pursuing all corporate activities in ways that give strong consideration to environmental protection.

Declaration of Social Contribution

TOA voluntarily conducts activities to resolve diverse social issues and contribute to society in general as a "good corporate citizen" trusted by society. We aim to grow together with society and become viewed by society as an "indispensable company," by e electively using company resources and conducting original activities with a strong awareness of our relationship with "sound and video," a business Leld we specialize in.

Planning and Design Carried Out in Japan

Thorough Proving of Product Design and **Production Processes**

The basis of our quality assurance activities is the product planning and design that is carried out primarily in Japan in response to market needs and in compliance with ISO9001:14001 standards. Our dedicated professional sta inspect products at every stage of the production process using their years of experience and their high levels of technological expertise.

Quality Control by TOA HQ

TOA production plants both within Japan and overseas are part of TOA Group. Numerous technicians from Japan are sent to our overseas production plants where they use state-of-the-art equipment to produce products under the same stringent quality control system as is used in our production facilities in Japan. Furthermore, twice a year, sta I from our Quality Control Division visit overseas production facilities to carry out inspections and ensure that quality standards are being maintained.

Microphones

Dynamic Microphones

>>> Unidirectional Microphone

DM-1100

- Dynamic hand-held microphone for general use

- Rigid diecast aluminum microphone body
 Switching and handling noise suppression
 7.5 m phone plug cable supplied with unit
 Microphone holder provided as standard accessory

>>> Unidirectional Microphone

DM-1200

- Dynamic hand-held microphone for speech use

- Rigid diecast zinc microphone body
 Switching and handling noise suppression
 10 m phone plug cable supplied with unit
 Microphone holder provided as standard accessory
 Balanced output for long distance connection

>>> Unidirectional Microphone

DM-1300

- · Dynamic hand-held microphone for vocal/speech use

- Rigid diecast zinc microphone body
 Switching and handling noise suppression
 10 m phone plug cable supplied with unit
 Microphone holder provided as standard accessory
- · Balanced output for long distance connection

>>> Unidirectional Microphone

DM-1500

- Suitable for vocal and speech application

- Robust diecast zinc microphone body
 Short type slide on/o switch reduces handling noise
 XLR-connector (balanced) and 10m cable with phone plug
 Adapter for stand mount is provided

Condenser Microphones

>>> Lavalier Microphone

EM-410

- Bectret condenser microphone element for voice-oriented applications such as lectures, presentations and religious services
- Designed for best performance when attached to the chest area
- Capsule rotates 360 degrees, for optimal pickup even when worn on a lapel

>>> Flush-Mount **Boundary Microphone**

EM-600

- · Bectret condenser microphone for conference room recording and
- Wide frequency range (30Hz-20kHz) provides well-balanced sound with clarity and a satisfying tonal response
 Unobtrusive design allows easy ush-mounting in walls, ceilings, and
- Optimized to deliver best performance when used on a desk or attached to a ceiling
- A 50 Hz low-cut Iter reduces intrusive noise, such as air conditioner rumble or door opening/closing
- Two rubber isolation rings provided as an accessory serving to reduce

>>> Boundary Microphone

EM-700

- Electret condenser microphone for speech and recording
- Design, optimized to deliver best performance when used on a desk
- Sim, stylish design suits interior decor
- Rejection of undesirable o -axis sound minimizes possible feedback
 Low-cut Iter switch prevents interference from ambient noise from
- being picked up
- · Wide frequency range of 35 to 20 kHz provides well-balanced sound with clarity and a satisfying tonal response

>>> Gooseneck Microphone

(With microphone stand: ST-800)

- Bectret condenser microphone for such speech applications as meetings, lectures, and religious services
- Excellent high-frequency response of 60 to 20k Hz delivers clear output
- · High sensitivity (-35dB) provides a satisfying tonal response
- Gooseneck with two adjustment points allows more exible microphone positioning angles
- Rejection of undesirable o -axis sound minimizes possible feedback

Model	EM-410	EM-600	EM-700	EM-800

Wireless Systems

TRANTEC Wireless Microphone Systems S5 and S4 Series

Additionally, presenters and the like also enjoy the wide variety of accessories that Trantec has to o er, allowing them to meet their professional needs

TRANTEC S5.5/S5.3 Series

S5 5/S5 3 UH rofessional Wireless icrophone System incorporates the latest technological advances, enabling it to satisfy the demands of a wide range of theater and broadcast applications The high quality audio and R dynamics combine with true diversity operation to provide a system with excellent multi-channel capability, enabling up to 2 channels to operate simultaneously without interference

icrophone size and running costs have been reduced, thanks to single AA cell battery operation, providing over 0 hours of continuous use The \$5.5 rofessional icrophone System o ers powerful features combined with an exceptional cost/performance ratio, and comes with all you need for quick and easy installation and operation

TRANTEC S5.5 Series 24 Channel Wireless Solution

>>> Receiver

S5.5-RX

- True diversity operation
- Up to 00 selectable frequencies (2 Simultaneous channels)
- · nteractive USB based computer control and monitoring for all aspects of performance
- · requency scan function
- ntegral triple tone grip/noise and signal strength mute circuit for protection against external interference
- Smple programming of transmitter with built-in nfra-red data link
- · Clear and intuitive LCD display
- E and phase reversal
- rofessional metal enclosure

Model	S5.5-RX
Diversity System	Space diversity (true diversity)
Audio Output	Line: -22 dB*/ Mic: 62 dB* Line: Mic: 600 Ω , balanced, XLR-3-32 type connector. Headphone: max. 100 mW 16 Ω , unbalanced, phone jack -28 dB*, 600 Ω , unbalanced, phone jack
Receiving Sensitivity	0 dB V or less (12 dB SINAD)
Squelch Sensitivity	6 - 36 dB V variable
Squelch System	Using together of noise SQ, carrier SQ and tone SQ
Indicator	LCD, Power lamp, Mute lamp, ANT A/B lamp
S/N Ratio	110 dB or more (A-weight)

TOA Wireless Microphone Systems 5000 Series

TOA 5000 Series is the ultimate choice for the presenter, o ering incredible intelligibility so your audience won t miss a single word ou can be assured that with TOA's continuous commitment to research and development, we will always provide wireless solutions that allow your voice to be heard clearly by all

TOA 5000 Series 16 Channel Wireless Solution

The Series lineup consists of microphones operating on a single battery, as well as microphones and a transmitter powered by rechargeable batteries. Battery chargers have also been added, for use with TOA-exclusive batteries.

The chargers are available in different capacities, while the transmitter is now a standalone unit, to allow users to select the type of microphone best suited to their needs. The WT-5100 receiver, a new addition to the 5000 Series, expands the range of applications, including museums, conferences and theaters, and enhances the Series' versatility and usability.

- ompact and lightweight but tough and very portable
- Maximum output power of 25 through the built-in 2 way speaker
- -4 00 tuner units Accept up to two
- nput volume and tone control for microphones A X input and cassette player (A-1 22)
- xternal speaker terminal
 ontinuous operation for approx. 24 hours (using alkaline batteries non-cassette mode)
- Recording tape speed control and auto-reverse function (A-1 22)
- · Built-in storage for wireless/wired microphones on the back

Infrared Wireless Microphone System

OAs infrared ireless Microphone System incorporates a range of conference and communication enhancing features that will appeal to users who want condentiality as well as interference-free communication.

Because the microphones use infrared signals sensitive matters being discussed in a meeting room won t leave the room and the wireless microphones can be used in several ad acent classrooms simultaneously without interference.

Digital Message Repeaters/ **Program Timer**

Digital Message Repeaters

>>> Sound Repeter

EV-20R

- For supermarkets and department stores with a distributed speaker system
- Up to 4 separate message selections or announcements to a total maximum of six minutes may be recorded
- Front panel-mounted recording inputs (mic/line switchable)
- PC connection via USB. A CD-ROM with various chimes is included
- $\bullet \ Pre\text{-recorded message can be transferred via USB-interface}\\$
- Built-in interval timer allows messages to be repeated at various time intervals (0.5 seconds up to ∞)
- \bullet 3W / 8Ω amplifier section built-in for direct speaker connection. Volume control for level adjustment of an external source
- · A line input and output for connecting various program sources including CD players or dedicated BGM inputs

>>> Digital Announcer

EV-350R

- Holds up to 2 memory cards (EV-CF 128M)
- The combination of 2 sampling frequencies (32k Hz and 44.1k Hz) and 4 recording grades (long, normal, high and extremely high) permits selection of up to 8 levels of recording sound quality
- Recorded sentences can be combined into complete messages and played back as a program
- Up to 256 programs can be played back
- Up to 256 or 1024 sentences (changeable) can be recorded
- (when 2 memory cards are installed)
- 2 difference messages can be simultaneously output to 2 locations
- In emergency situations, Emergency messages (pre-recorded) can be set to override current programs
- Recording, playback, erasure, and stop can be remotely controlled by external equipment
- Built-in timer allows the same messages to be repeated at preset time intervals

Program Timer

>>> Program Timer

TT-104B

- For timed control of external equipment and events
- Four independent outputs with 30 programmable steps per output
- Outputs features 0.5A (24V DC) five second dry contact closures
- Weekly program with pause mode for vacations/holidays
- -/+5 second per month clock accuracy with four day backup battery if power fails

Mixers

Digital Stereo Mixers

>>> Digital Stereo Mixer

M-633D

- Stereo mixer with 12 input channels (6 monaural inputs and 3 stereo inputs) and 6 output channels (2 monaural outputs, 1 stereo output, and 1 stereo recording output)
- 2 monaural bus lines allow each input signal to be assigned to each bus line individually
- · Automatic Resonance Control function, Feedback Suppression function, and Automatic Clipguard enhance sound intelligibility
- · Automatically eliminates unpleasant reverbration and feedback to deliver clear, highly articulate sound
- · Ideal for houses of worship, gymnasiums, meeting rooms, and more

M-864D

- Stereo mixer with 22 input channels including 8 monaural input channels and 7 stereo input channels
- 6 output channels including 4 monaural output channels and 1 stereo recording output channel, and 4 bus channels
- · Automatic Resonance Control (ARC) measurement and processing algorithm that optimizes speech and sound clarity for individual acoustic environments
 Automatic stereo input mute (Auto Mute or Ducker) function that mutes stereo
- input automatically when detecting a monaural control signal • Dedicated GUI software facilitating higher-precision parameter setting adjustment
- Finer speaker setting possible when used in combination with optional Digital Speaker Processor DP-SP3

MB-25B

For A-2000, A-1800 and A-1700 series,

Package Amplifier

>>> Package Amplifier

(HV version)

- Cost effective package amplifier that's compact, lightweight and best suited for paging and background music distribution
- 3 microphone inputs and 1 AUX input
- 100V and 4 ohm speaker outputs
- Muting function for MIC1 over-ride of the other inputs

Model	A-230	
Power Source	220 – 230V AC, 50/60 Hz or 12 V DC	
Rated Output	30W	
Frequency Response	50Hz – 20kHz	
Input	MIC 1 – 3: phone jack AUX: RCA pin jack	
Output	Speaker out: High impedance: 330Ω (100V), Low impedance: 4Ω (11V)	
S/N Ratio	60dB or more (MIC 1 – 3), 70dB or more (AUX)	
Tone Control	Bass: -10dB at 100Hz, Treble: -10dB at 10kHz	
Muting	MIC 1 overrides other Mic inputs and AUX inputs with 0 – 30dB attenuation, attenuation by MIC 1 input	
Dimensions	350 (W) × 105 (H) × 240 (D)mm (13.78" × 3.97" × 9.45")	
Weight	3.5kg (7.72 lb)	

9000M2 Series Modular Digital Matrix Mixer/Amplifier

The TOA - 000 2 Digital atrix ixer rede nesthe mixer category, by combining a modular matrix mixer and digital signal processor (DS) in a compact two-rack package This versatile new modular unit is ideal for multi-zone paging, music distribution and room-combining applications The - 000 2 combines an enhanced GU programming interface with exceptional audio quality

>>> Digital Matrix Mixer/Amplifier

M-9000M2

- Flexible modular design up to 8 mic/line inputs and 8 outputs
- Detailed GUI software screens make even complex settings intuitive and easy to understand
- Any of the 30 EQ presets appropriate to the TOA speakers used may be selected for each output
- Up to 16 flush-mount remote panels connectable
- Programmed operating system 32 scene memories and 32 paging memories
- Dual Channel Digital Signal Processor (DSP) on Input & Output channels: 10-Band Parametric EQ/High and Low Pass Filters/Bass and Treble/Loudness/Compressor/Gate/Ducker/NOM (Automix)/ Delay (Output channel only)/TOA Speaker EQ Presets (Output channel only)/ DSP included on M-9000M2 Mainframe Outputs, D-001T, D-001R and T-001T modules

Model	A-9120DHM2		
Power Source	AC Mains, 50/60Hz		
Power Consumption	40W		
Audio Input	Max. 8 channels, modular construction (modules optional)		
Audio Output	Preamplifier output 1, 2: $0dB^*$, 600Ω , balanced, removable terminal block (3 pins)		
Frequency Response	e 20Hz – 20kHz +1, -3dB		
S/N Ratio	At input short, 20Hz – 20kHz, ALL FLAT or OFF setting Output volume min.: 90dB Output volume max.: 61dB (input 1 vol.: 0dB,other inputs:OFF)		
Crosstalk	64dB or more at 20kHz		
Tone Control	Bass: +/-12dB (at 100Hz), Treble: +/-12dB (at 10kHz)		
Parametric EQ	10 bands, Freq: 20Hz – 20kHz, 31 steps, Various range: +/- 12dB, Q: 0.3 – 5		
Speaker Equalizer	10 (setup software has 30 TOA speaker presets)		
High-pass Filter	-12 dB/oct, Variable frequency range: 20Hz - 20kHz, 31 steps		
Low-pass Filter	-12dB/oct, Variable frequency range: 20Hz - 20kHz, 31 steps		
Compressor	Depth: 1 - 5		
Delay	0 – 40ms (1 ms steps), maximum 40ms (CH1 + CH2)		
Scene/Paging Memory	32/32		
Control Input/Output	RS-232C, D-sub connector (9P, female) Control input: 4 inputs, no-voltage make contact input, open voltage: 3.3V DC, short-circuit current: 1mA or less, removable terminal block Control output: 4 outputs, open collector output, withstand voltage: 27V DC, control current: 50mA, removable terminal block Remote volume: 2 channels, connect a 10kΩ/linear taper variable resister or 0 – 10V DC, removable terminal block		
Dimensions	420 × 107.6 x 353mm		
Weight (without modules)	6kg

System Management Amplifiers

>>> System Management Amplifier

VM-2120 120w

(ER/L version)

VM-2240

(ER/304L version)

- Programmable system management amplifier
 - 5 switchable high impedance speaker zones with
- adjustable attenuators
 9 units can be combined to increase the output power and number of zones (Up to 45 zones)
- 4 input channels come with volume and bass/treble control on the front panel
- Both BGM inputs with level pre-adjustment
- The routing to the zones of the 3 microphone/line level inputs and the telephone paging input can be pre-set
 Additional features: Emergency power input, remote power control, 7 built-in chimes etc
- 19" rack mountable
- (3 units, optional MB-36 brackets required)
- EN 60849 certified

Model	VM-2120/2240
Power Source	AC: 120V, 50/60Hz (L/304L version), 230V, 50/60Hz(ER version) DC: 24V/15A
Rated Output	120W(VM-2120), 240W(VM-2240)
Frequency Response	50Hz – 16kHz
Distortion	Under 1%
S/N Ratio	Over 60 dB
Tone Control	Bass: 100 Hz ±10 dB, Treble: 10 kHz ±10 dB
Audio Input	Mic/Line input × 3 Telephone paging input BGM input × 2 Power amplifier input External speaker line input
Audio Output	Speaker output Direct speaker line output Line output Recording output Preamplifier output
Control Input and Output	(1) External control input •Activation of messages •Activation and stop of Emergency Broadcast •Unit's broadcast cutoff (when activated by an external emergency equipment) (2) Status output •Irregularity of communications with the Remote Microphone and an expansion amplifier •AC power condition •DC power condition •Irregularity of the sound source of the Voice Announcement Board •Failure (FAULT) indication on •Power switch on
External Attenuator Control Output	Plug-in screw connector, relay, no-voltage make contact output, transfer type, withstand voltage: 30 V DC, 125 V AC, contact current: under 7 A (DC), under 7 A (AC)
Surveillance Input and Output	Input: No-voltage make contact input, open voltage: 3.3 V DC, short-circuit current: under 1 mA Output: Open collector output, withstand voltage: 30 V DC, control current: under 10 mA
Chime Tone	Built-in chime, Voice Announcement Board sound source
Function	Two units stacking (VM-2120 or VM-2240) Emergency broadcast (sequential control) Broadcast priority control Surveillance (failure detection) function Power supply to only one Remote Microphone (RM-200M) Line resistance: Under 40 Ω (one way)
Dimensions	419 (W) ×143.3 (H) × 355.7 (D) mm
Weight	12.5kg (VM-2120), 14.5kg (VM-2240)
*0dB = 1V

High reliability

The DA amplifier has a comprehensive protection circuitry for protection against excessive current flow due to overload, short circuit, unusual DC voltage output, and power amplifier heat sink temperature rise (over 100°C), temperature rise inside the unit (over 80°C).

• Amplifier with lightweight design Installation has become much easier thanks to the lightweight design.

Extremely high amplification efficiency of 80-90%, resulting in reduction in power consumption by more than 60% compared with Class-AB amplifiers.

· Highly durable

Stands up to extended hours of operation. The DA amplifier has undergone a large number of rigorous tests to prove its durability. In addition, TOA has been conducting a "non-stop driving test" of the DA Series.

• Compact design
The DA-250 Series is 1-unit size, and they can be efficiently mounted on a rack, so they require only a small installation space. Because the amplifiers do not generate much heat, 5 units can be stacked together in a rack.

Independent power supply

Eeach of the channels has its own power supply. If the power supply of Channel 1 should fail, this won't affect the operation of Channel 2. It is also possible to use the other channel as a spare amplifier.

>>> Horn Speaker

TC-651M

- Both high-impedance (70V/100V lines) models and low-impedance (8 Ω /15W model, 16 Ω /30W model) models available
- •Two power ratings: 15W and 30W
- Stainless steel hardware(screws, bolts, nuts), and powder-coated horn and bracket ensure superb weatherproofing and corrosion-resistance.
- Shock-resistant aluminum round horn
- Compliance with IP65

- High durability, high heat-resistance and improved low frequency sound thanks to polyimide diaphragm
 More than 100 hours of operation at 50 W in continuous
- load test employing test signal that meets IEC 60268-1: 1985 standard
- · Stainless steel hardware (screws, bolts, nuts), and powder-coated horn and bracket for weatherproofing and corrosion-resistance.
- Shock-resistant aluminum round horn
- Wide temperature range of -20°C to 60°C
- Compliance with IP65

F Series Wide-dispersion Ceiling Speakers

- Expanded listening coverage area through extra-wide dispersion characteristics
- · Minimal high frequency rolloff allows clear and well-balanced sound reproduction over a wide listening area
- Designed to blend into ceilings with a smooth, low-profile design
- Extra ease of use and higher cost-effectiveness with the metal "back can" enclosure for the speaker rear. (F-122C, F-2352C, F-2852C, F-2322C models)

F-2852C

- 2-way speaker for high power
- applications e.g. for high ceilings (3 to 6 m)
 Diffusor for wide dispersion of
- high frequencies
- Metal back can

F-2322C

- Full range speaker for medium
- ceiling height (2 to 4 m)
- · Metal back can

F-2352C

- 2-way speaker for medium
- ceiling height (2 to 4 m)

 Diffusor for wide dispersion of high frequencies
- Metal back can

F-122C

- Equalizing controlled type full range speaker for medium ceiling height (2 to 4 m)

 Cost effective if many speakers are installed
- Heat-resistant back can
- Optimized for use with optional digital processors
- · Diffusor for wide dispersion of high frequencies

F-2352SC

- 2-way wide range speaker with diffusor for low power applications and medium ceiling height(2 to 4m)
- Easy installation
- Diffusor for wide dispersion of high frequencies
- · For use in ceilings with minimal depth

F-1522SC

- · Cost-effective compact full range speaker for medium ceiling height (2 to 4 m)
 Only 117 mm mounting depth
- Flat front panel

Interior Design Speakers

- · Sleek, stylish appearance blends well with modern architecture for background/foreground music and paging systems
- · Minimum reflection design reduces sound wave reflections typical of conventional bracket-mounted "box" type speakers
- Two-way, sealed enclosure
- Weather-resistant versions (H-2WP/H-3WP)
- Wide coverage area:(H-1) 120°H x 100°V (H-2/H-2WP) 100°H x 60°V (H-3/H-3WP) 140°H x 70°V

- Loudspeaker components rotate internally to allow flexible aiming (H-1/H-2/H-2WP)
- Built-in passive crossover with optimized filter slopes
- Fire-resistant ABS resin enclosure (H-1/ H-2)

Compact Satellite Speaker System

>>> Compact Satellite Speaker System

BS-301B

>>> Compact Satellite Speaker System

BS-301W

- Consists of a set of 4 satellite speakers and a subwoofer, which are individually fitted with its own mounting brackets
 • Compact and highly efficient in performance
- The mounting brackets fitted onto the satellite speakers can be for 1 speaker or 2 speakers installation

Model	BS-301B (Black)/BS-301W (White)
Power Handling Capacity	Continuous program: 160W* x 2 channels/Continuous pink noise: 80W* x 2 channels
Sensitivity	81dB (1W, 1m)* x 2 channels
Frequency Response	40 – 20,000Hz* x 2 channels
Weight	13.9kg (excluding mounting bracket)
Subwoofer	Speaker component: 16cm cone-type x 2 channels / Finish: Front panel; ABS resin, Enclosure; Wood, Speaker bracket; steel plate
Dimensions	210 (W) x 390 (H) x 563 (D)mm / Weight: 11.5kg (excluding mounting bracket)
Satellite Speaker Dimensions	Speaker component: 8cm cone-type / Finish: Enclosure, Front panel; HIPS resin, Speaker bracket; steel plate 92 (W) x 97.5 (H) x 100 (D)mm / Weight: 600g (excluding mounting bracket)
Product Composition	Subwoofer x 1, Satellite speaker x 4
Accessory	Subwoofer mounting bracket (black or white) x 4, Rubber foot and fixing screw for subwoofer x 4, Subwoofer mounting screw x 1 set, Satellite speaker mounting bracket (black or white) x 6, Satellite speaker mounting screw and plain washer and spring washer x 1 set, Sticker for satellite speaker (black or white) x 8

^{*} Overall characteristics measured in a set configuration of a subwoofer (L or R channel) and 2 satellite speakers

Steerable Active Line Array Speaker

>>> Compact Satellite Speaker System

SR-D8

- A total of 16 speakers (in up to 4 stacks) can be controlled as a single unit via GUI-operated software
- The GUI software provides control of all functions, including mixing, digital signal processing and simulations
- The speaker comes with a wealth of DSP functions, including gain, mute, compression, delay, auto-mixing, high/low pass filters, high/low shelving filters, and a notch filter
- Equipped with two analog audio input terminals and four digital audio input terminals for CobraNet connection, the speaker supports 6 x 2 matrix mixing. Using the Auto-mix function—which can be set for each input—enables users to prioritize selected inputs for broadcasting.
- Coverage: Horizontal 90°

Vertical Beam Width - 45°

Verticle Beam Angle - ±45° (Adjustable via dedicated GUI software)

Model	SR-D8
Power Source	220-240V AC, 50/60Hz
Power Consumption	320 W (Rated output), 72 W (Based on EN Standards)
Frequency Response	140 Hz - 20 kHz
S/N Ratio	90 dB or more (A-weighted)
Amplification System	Class D, 8 channels
Output	30 W, 1 channel (1% THD+N)
Max SPL	Max. 93 dB SPL (A-weighted, pink noise, 30 m)
Finish	Enclosure: MDF, white, paint, Front grille: Punched steel plate, white, acrylic paint
Dimensions	160 (W) x 895 (H) x 255 (D) mm (6.3" x 35.24" x 10.04")
Weight	21 kg (46.3 lb)
Accessories	Power supply cord (2 m) x 1, Removable terminal plug (3 pins) x 2, Removable terminal plug (2 pins) x 2, Ferrite clamp x 1, CD-ROM (setting software) x 1

Conference System

Infrared Conference System TS-800/TS-900 Series

- For efficient communications in each kind of conference
- · Safe and secure infrared wireless technology
- Up to 96 active units (TS-900) or 64 active units (TS-800) per system
- · Chairman unit features a priority speech key
- · Auto Mic-Off function

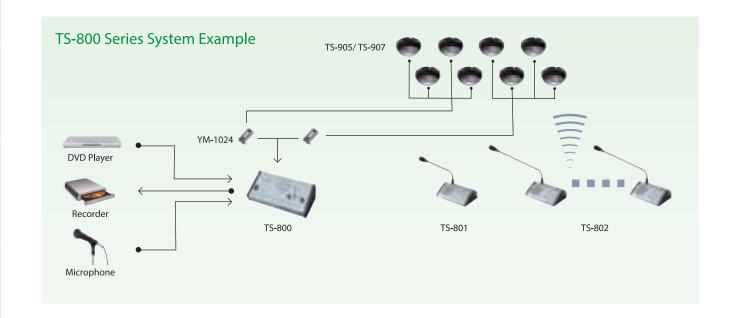

- System with voting function (TS-900) or standard system (TS-800)
 Compact and lightweight chairman and delegate units
 No cabling makes installation easy
 Speaker restriction function

- · Installation status checkup function

- · 2 channels for 2 languages
- · For bilingual conferencing and voting with triple choice vote function
- Up to 96 units per system
- 1 line and 1 recording output
- · Channel selector for conference language
- · 2 different versions for chairman and delegates
- To prevent feedback, the built-in speaker is turned off while the microphone is on
- · 2 headphone jacks

Infrared Conference System TS-800/TS-900 Series

- Up to 64 active units per system
- Audio input from a wired microphone or other sound source
 1 line and 1 recording output

>>> Microphone >>> Microphone TS-903 TS-904

Wired Conference System TS-770 Series

- Maximum 70 Chairman and Delegate Units (up to 35 units* per line) are connectable to one Central Unit
 *If the TS-775 Remote Delegate Interface Unit is used, up to 35 TS-775 Remote Delegate Interface Units can be connected per line also
 Expandable to maximum 210 units by connecting 2 additional Central Units
 Equipped with an All-Mic-On function that simultaneously turns on all microphones for sound collecting and recording of all units

- Remote conferencing is possible, enabling people at a remote location to participate in the conference
- The Test Function feature enables easy checking of the connection status of all connected units
- Number of simultaneously usable delegate units can be selected
 Automatic Mic-Off function (TIME OUT)

>>> Central Unit

TS-770

- Supplies DC Power to all units, with lamp indicator
- Jack for microphone input, and AUX input
- Microphone, AUX, line (for conference unit's built-in speaker)
- and chime(on chairman's unit) volume controls
- Equalizer input
- Recording output

>>> Chairman Unit

Technical Column

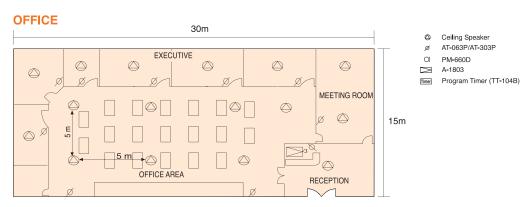

System Application 1

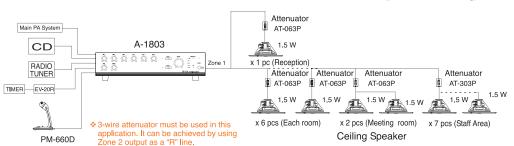

- · Background music distribution (Speakers are spaced as short as 7m apart)
- Announcement / paging from the office
- · Volume control for the office

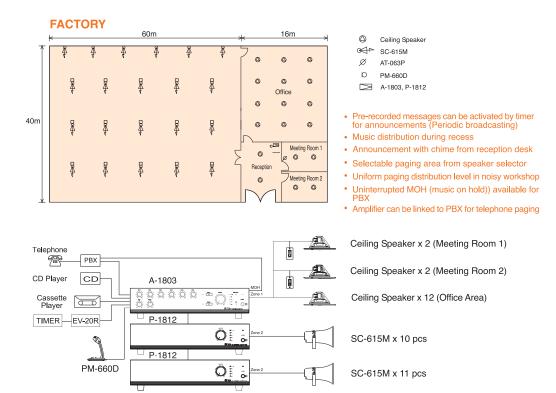

System Application 2

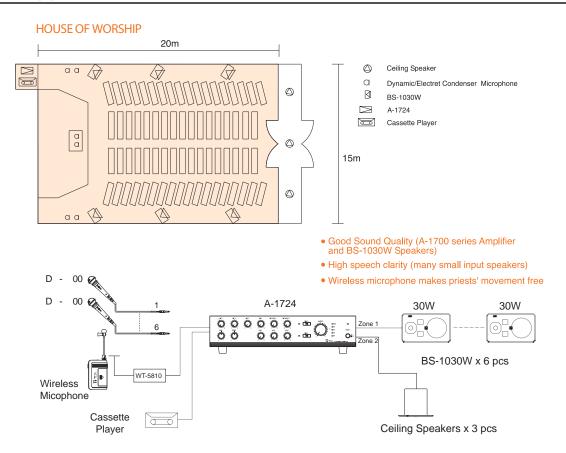

- · Uniform background music distribution level in office area (Speakers are spaced as short as 5m apart)
- Background music of better sound quality (A-1800 series amplifier)
- Announcement with chime from reception desk
- Volume control in individual rooms
- Emergency broadcast is possible from main Building PA System
- Pre-recorded messages can be activated by timer for announcements (periodic broadcasting)

System Application 3

System Application 4

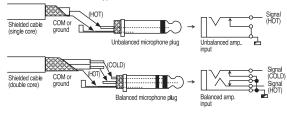

Microphone

Wiring of microphones

Output from a microphone is rather weak; therefore, it is important to use shielded cable for microphones to prevent line noise. The low impedance shielded cable intended for microphones are commercially available. The shielded cable is generally used to transmit the audio signals from microphones (-70dB/0.3mV) or source equipment (0dB/1V).

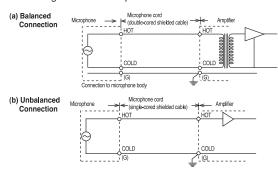

Balanced and unbalanced type

Balanced and unbalanced output

There are two kinds of output from a microphone: balanced and unbalanced. With balanced output, the audio signal appears between the hot (on-going audio signal) and cold (return audio signal), which are both independent of the ground. With unbalanced output, the audio signal appears between the hot and ground (connected to the cold). The connection between balanced output and balanced input (on the amplifier side) is virtually unaffected by external line noise, and it is used for wiring between long distances. Double cored shielded cable is used for connecting.

balanced output, and single-cored shielded cable is used for connecting unbalanced output.

Distance of extension for microphone cords

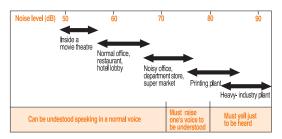

The following table shows the maximum extension distance for microphone cords. when distance extends beyond the following figures, exessive noise will make the microphone impractical, and therefore it will be necessary to use a microphone mixer to boost the signal level to minimize the influence of noise.

Microphone output	Amplifier input	Microphone cord extension distance
Unbalanced	Unbalanced	20m
Balanced	Unbalanced	20m
Balanced	Balanced	80m

Speakers 1

Rough guide for noise levels and audio levels necessary for loudspeaker (for all types of speakers)

Noise levels are expressed in decibels (dB). Below are some typical examples.

When transmitting voice or music through a speaker, it is necessary to transmit at a level that is higher than the ambient noise level. In the case of voice transmission, it should be transmitted at a level 5 to 10 dB higher than the noise level, background music 3 to 5 dB higher, and foreground music 15 to 20

Computation of intensity of sound

As an index to express the intensity of sound from a speaker, sound-pressure level (in dB) is generally used. The sound-pressure level rises as the electric input to the speaker increases, and falls as distance from the speaker increases. This relationship is shown by the following formula:

The SPL (1W/1 m) indicates the sound pressure level at a point 1 meter away from a speaker when an electric input of 1 W is applied to that speaker. This is used to express comparative speaker efficiency, such as in a catalog.

Attenuation of SPL due to distance

(amount of attenuation = 20 log D D: distance in meters from speaker)

*			•							,
Distance (m)	2	5	10	15	20	30	40	60	80	100
Amount of increase (dB)	6.0	14.0	20.0	23.5	26.0	29.5	32.0	35.6	38.1	40.0

Increase of SPL due to electric input

Electric Input (W	1	1.5	3	5	6	10	15	20	30	50
Amount of increase (dB)	0	2.6	4.8	7.0	7.8	10	11.8	13	14.8	17

Example of calculation:

The SPL(1w/1m) of the model SC-615M is shown as 112 dB. The soundpressure level of this model at distance of 10 meters with an input of 10 W can be calculated as follows according to the above table:

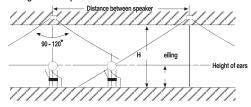

SPL = 112 dB - 20 dB (10m) + 10 dB (10W) = 102 dB

Arrangement of speakers in a general office (Ceiling speakers)

Ceiling-mounted speakers are generally used, and their coverage angle is between 90 and 120 degrees. The smaller the distance between speakers, the better the sound quality and the more even the sound volume. The following table shows the area that can be covered by one speaker.

Speakers 2

Arrangement of speakers

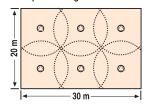

Area of coverage of one speaker

Purpose	Height of ceiling	Distance between speakers	Area of coverage of one speaker		
Background music	Less than 2.5m 2.5 - 4.5m 4.5 - 15m	5 m 6 m 9 m	About 25m ² About 36m ² About 81m ²		
Announcement		9 to 12m	81 to 144 m ²		

For general office use not to include background music, speakers should be arranged about 9 to 12 meters apart. Shown below is an example of speaker arrangement in a 30 m x 20 m office with ceiling height of 3 m, which indicates that this office requires about 6 speakers.

Example of arrangement

Office of 30 m x 20 m with 3 m ceiling without music

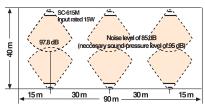

Number of speakers necessary: 6 to 8

Arrangement of speakers in a factory (Horn speakers)

Factories with high noise levels generally use horn speakers, which can produce high levels of sound. If you know where people are working in the factory, speakers are best arranged to cover such locations. If that is unknown, speakers should be arranged in accordance with the floor space.

Here is an example of a 40 m \times 90 m room in factory with a noise level af 85 dB. In this factory, SC-615M speakers are installed; therefore, the sound pressure that can be obtained at a point 20 meters away with electric input of 15 W will be: [112 dB (1W/1m) - 26.0 dB (20 m) + 11.8 dB (15 W)]=97.8 dB

This is a sufficient sound pressure level, 10 dB higher than the noise level. The speakers are installed 20 to 30 meters apart, and 6 speakers can generally cover the area. The sound pressure level near speakers is rather high, so it is necessary to install the speakers at a height of more than 4 meters.

Speaker wiring

For speaker connections, use 600V vinvl (PVC) insulated wire of 1.2mm to 1.6mm in diameter (AWG17 to AWG 14)

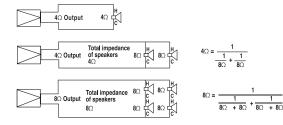

Speakers 3

High-impedance connection and low-impedance

The PA amplifiers generally come with low-impedance speaker outputs (indicated as 4 Ω , 8 Ω , 16 Ω , etc) and high-impedance outputs (indicated as 70V, 100V, etc). Low-impedance output is used when a small number of speakers (1 to 4) is used and there is a short distance (10-some meters) between amplifiers and speakers. High-impedance output, is used with a large number of speakers and a longer distance of wiring. Speakers with transformers are used for high-impedance output. For a PA system, high impedance connection should be used if possible, in consideration of wrong speaker connections and transmission

■ Example of low-impedance connection:

It is necessary to design the total speaker input impedance to be larger than the amplifier output impedance. When the total speaker impedance is lower than the amplifier output impedance, unstable operation or amplifier malfunction may result. The wiring distance between amplifier and speaker should be less than 10-some meters. If the wiring distance is greater than this, the output power from the amplifier will be consumed as heat in the cables, and not be able to supply the speaker with sufficient power.

Example of high-impedance connection:

In a PA system to cover a large area, the wiring distance will be greater, so high impedance connection is used predominantly. In high-impedance connection, all speakers (each with a transformer) will be connected in parallel. Avoid using these speakers together with those without transformers.

In high-impedance connection, as long as you have parallel connection. It will be sufficient to design the total speaker input to be lower than the amplifier output, and this will help eliminate complex impedance calculation.

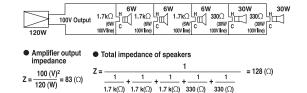

Speaker input impedance (10W/100V line)

$$Z = \frac{100 \text{ (V)}^2}{10 \text{ (W)}} = 1 \text{k}\Omega$$

Amplifier output 60W = total speaker input (60W)

Even when connecting speakers with different inputs, there will be no problem as long as the total wattage of the speakers does not exceed the amplifier output.

Amplifier output 120W > total speaker input (78W)
