

HY-CN7W-WP

SPEAKER CONNECTION BRACKET

The HY-CN7W-WP is used to join 2 HX-7W-WP speaker systems, typically for the purpose of achieving better speaker directivity control in lower frequencies. Such directivity control helps achieve clearer and longer-range-sound reproduction in locations where sound efficiency may be hampered by conditions like long reverberation time or a high level of background noise. This bracket is designed for outdoor use.

Order no: HY-CN7W-WP

Specifications

Weight	300,0 g
