

The surveillance monitor VX-300SM-EB can easily be installed in a cabinet rack on standard DIN rails. It controls up to 8 EOL modules, each connected to one speaker line. The monitor informs single speaker line faults (short circuit or break) by individual control outputs as well as a general speaker line fault by a separate control output. Green LEDs on the module corresponding with the loudspeaker lines indicate the correct function of each. The 3-wire EOL-system is certified together with the VX-3000 system.

Order no: VX-300SM-EB  
Alternative products: VM-300IS-EB, VX-3008F,  
VX-3016F

## Specifications

Power source	19 - 33 V DC
Current consumption	100,0 mA
Control output	line fault (individual channel) x8, common line fault x1
Input / Output	8 speaker line sensor inputs
Indicator	8 Line fault LEDs, 1 power LED
Connection	12-pin screw terminal x1, 3-pin screw terminal x1, RJ45 jack x1
Dimensions (W x H x D)	133 x 20 x 72 mm
Dimensions (ø x D)	x 72 mm
Finish	Surface treated steel plate, white paint (RAL9016)
Operating humidity	90% or less
Operating temperature	-5°C to +45°C

# VX-300SM
